

Introducing...

GSM Audio Intercom and Access Control

GSM Door Entry System employing mobile phone technology to communicate and operate doors and automatic gates. Based on the 4000 Series door entry panel design, the GSM amplifier is totally self contained and only requires an external power supply and antenna while having the flexibility to combine with the full range of the 4000 series module features.

Features:

- Up to 10 call buttons
- Dials any land line or mobile number
- Divert a call to a second number when first is busy or not answered
- Dry contact relay output
- Auxillary output (open collector)
- Push to exit and auxillary inputs
- Programmable via SMS or dial in
- Access control feature for up to 250 users (SIM card dependent)
- Check the signal strength via SMS
- Programming menu protected by programmable 4 digit code
- Automatic call facility to retain the network connection if the system is not used for long periods of time

Once selected. Twice the support.
