

## ORION

Directional, external photocells with aligning facility, consisting of a transmitter and receiver with modulated infra-red rays. Professional and recommended for long distances. Highly versatile, it can also replace an embedded photocell, covering any hole in the pilaster, and enabling quick installation.

Conformity to the European norms EN12453 – Type D, Category 3

### Technical specifications

Power supply	24Vdc (19÷35Vdc)
Absorption power	TX 20mA - RX 30mA
Nominal range	30 meter
Detection angle	+/- 4°
Contacts type	NO/NC
