

## VEGA E VEGA BUS

Self-aligning, external photocells in traditional technology 24Vac/Vdc and/or Bus (G-WAY), extremely compact consisting of a transmitter and a receiver with modulated infra-red rays. Its compact size enables easy positioning in little space.

Conformity to the European norms EN12453 – Type D, Category 3

### Technical specifications VEGA

Power supply	24Vac/Vdc
Couple's absorption power	50mA
Nominal range	20 meter
Alignment	Automatic

### Technical specifications VEGA BUS

Nominal range	15 meter
Alignment	Automatic
Self-aligning angle	+/- 7° (m 15) +/- 13,5° (m 5)
Couple's absorption power	20mA
