

# Viro V90 & V96

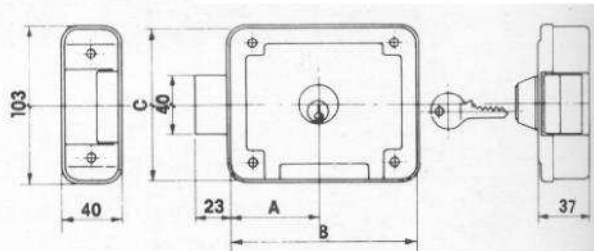

**V90 ELECTRIC LOCK WITH ROTATING DEADBOLT FOR DOORS AND GATES OPENING OUTWARDS**

- When the electric impulse is given, the lock will remain open until it is closed again, even if there is a door closer and/or an automatism.
- Single version, entirely galvanized.

- 12 Volts. A.C.

**Mounting Vertically**

**Mounting Horizontally**

	A	B	C
V90	70	124	100
V96	70	124	67

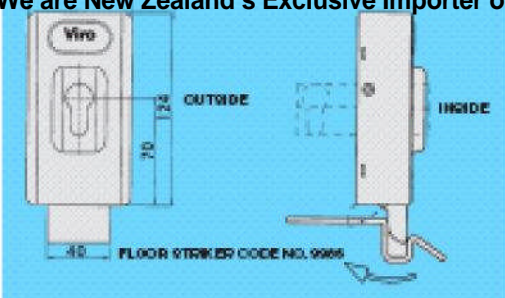

Measurements in mm.

**V96 ELECTRIC LOCK WITH ROTATING DEADBOLT SUITABLE FOR PEDESTRIAN GATES**

- The lock will open only when both the electric impulse and a manual or an automatic pressure have been given simultaneously.
- We suggest not to install this lock when also a door closer is fixed to the door or the gate.
- Due to its reduced dimensions it is easy to be installed on narrow frames.
- Vertical or Horizontal installation
- Single version, entirely galvanized, supplied with floor striker. 12 Volts. A.C.

We are New Zealand's Exclusive Importer of Viro Products.
